Tile Adhesive Number 1

غراء بلاط رقم 1

Description

A specialized and powerful Tile adhesive for swimming pool is able to resist up to high immersion water and chlorine water and also ensure water resistance after immersion.

Instructions of Use

- 1- Surface preparation: Ensure the surface is clean, with no loose material, dust, grease, and oil.
- 2- Add 4.0 lit of water to 20 Kg tile adhesive. Slowly add water while mixing continuously with the spreader. Add 1000-2000 gpm for 3 min until uniform consistency is obtained.
- 3- Apply the adhesive to the surface with a trowel thickness of 2-3 cm immediately using a trowel.
- 4- Apply the adhesive to the surface with a trowel thickness of 2-3 cm immediately using a trowel.
- 5- Fix the tile on the adhesive and press firmly to ensure maximum bonding between the tile and adhesive.

Technical Information

Application temperature: from 5 to 35 °C
Add 3.0 lit of water to 20 Kg tile adhesive. 1.5 lit of water gives 15% of mixed adhesive.
Compressive strength: > 1.5 N/mm²

Storage

Original sealed container has a shelf life of 12 months provided it is stored clear of ground and moisture and in dry sealed plastic bags or 20 °C.

Coverage

4 sqm per 20 Kg bag in thickness of 2 cm
